

## Appiani

**Metrica:** the cadenced decorations, periodic recurrence and regular flow of geometric elements dictate the rhythm of the collection.

The linearity of the geometry is animated by light and colour.

Metrica's 4 decorations, in 4 colour variants, take their names - Cerchi, Trattini, Incroci and Parallelo - from the geometries that occur naturally when different modules are juxtaposed.

Technical specifications: dry-pressed sin-

gle-fired mosaic; size 1.2x1.2cm; thickness 6.5mm; mounted on 30x30cm mesh.

## Ferrari & Cigarini

The **MGP/3** is a machine for creating steps and profiles in ceramic, gres porcelain, marble, granite and agglomerates.

It's an innovative, compact, automatic model offering two types of machining:

- 45° chamfer for steps.
- profiling for skirting-boards, plinths, thresholds, window sills, bull-noses and half bull-noses.

The MGP/3 consists of three motorised tool-spindles, which

are angle-adjustable for 45° chamfers for steps, and vertically adjustable for profiling. The MGP/3 is also available in a five-head version for working with five different types of grinding wheel simultaneously, in order to reduce machining times.
